

JOBCHG(a)

JOBCHG(a)

NAME

jobchg — change control to next process

SYNOPSIS

(jobchg = 23.)

jobchg 0

DESCRIPTION

Jobchg causes the current process to give up control to the next process which is ready to run.

If there is no other process ready to run, control will be returned back to the current process.

A value of 1 is returned from C.

SEE ALSO

DIAGNOSTICS

A -1 is returned from C if no process is ready to run.
