ATOI(III)   ATOI(III)

NAME

atoi − convert ASCII to integer

SYNOPSIS

atoi(nptr)
char *nptr;

DESCRIPTION

Atoi converts the string pointed to by *nptr* to an integer. The string can contain leading blanks or tabs, an optional '−', and then an unbroken string of digits. Conversion stops at the first non-digit.

SEE ALSO

atof (III)

BUGS

There is no provision for overflow.
